

**March 2026**

## **Declaration on Animal- and Human-Derived Substances**

To the best of our knowledge, the products supplied by CML Micro do not contain any substances derived from human or animal origin.

We work closely with our suppliers to obtain material composition information and relevant declarations, and to ensure that all materials used in the manufacture of our products are appropriately assessed. This includes supplier qualification, ongoing communication, and material review processes to support compliance with applicable UK regulatory requirements, including those overseen by the Medicines and Healthcare products Regulatory Agency (MHRA).

Where relevant, this includes consideration of requirements under the Human Tissue Act 2004 and applicable regulations relating to animal by-products, including the The Animal By-Products (Enforcement) Regulations 2013.

This declaration is made in good faith based on information provided by our suppliers and current knowledge of product composition.
