

Feb 2026**REACH Banned Chemicals Statement for the Electronics Industry**

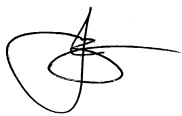

At CML Microcircuits, we are committed to ensuring the safety of our products and compliance with all relevant regulations. In accordance with the European Union's REACH Regulation (EC) No 1907/2006, including all current amendments and updates up to February 2026, particularly the expansion of the Candidate List of Substances of Very High Concern (SVHCs) to 253 entries.

As a manufacturer in the electronics industry, we understand the importance of protecting both human health and the environment from the risks associated with harmful chemicals. We have implemented rigorous screening processes to ensure that none of our electronic products contain any banned chemicals or materials prohibited by REACH.

In addition, we collaborate closely with our suppliers to ensure that our finished goods comply with REACH standards. We continually monitor and assess the REACH candidate list of SVHCs and ensure our products are free from these substances unless specific authorisation has been granted under REACH.

We are committed to providing safe, sustainable, and high-quality products to our customers. Our compliance with REACH ensures that we contribute to reducing environmental impact and protecting the health and safety of consumers worldwide.

For further information or to request product compliance details, please contact CML Micro Compliance Team.
